## ARCADE MATRIX

Part of group-exhibition The century bar/ Teil der Gruppenausstellung Die Jahrhundertbar  
Kunstraum Ventilator, Berlin, Germany

Scenographic Installation / Szenografische Installation

wood, plasterboard, paint  
Holz, Gipskarton, Farbe

Building the scenography for a painting exhibition with a focus on aesthetics from movies of the 1920s.

In discussion with the curators, an Arcade structure made from triangular modules has been build in the space. It is visually dissecting the space, making it seem bigger. as a whole. It was created as a matrixial system that holds paintings and allows them to be grouped differently in the space.

The work has been comissioned by Malerinnennetzwerk Leipzig-Berlin.
